Vaccination App

Group Members:
1. Muhammad Imtiaz (15026420)
2. Muhammad Haroon (14031184)
3. Zainab Malik (15026433)
4. Bilal Yousaf (14031236)
5. Atiq Zaman (15026391)

Description:

This system will help vaccinators and parents to get all information of vaccinations through one app. if a vaccinator or parent wants to know about any child's current vaccine's record of already given or due ones, they can see these details through this app . basically; this is the replacement of registered base system. In short, the main purpose of this app is to bring all the information on a single platform so that both will be able to get benefit out of it.

Individual work:

I work on database design with one of my group mate. Database design is the main building block of our project and I also work on backend coding in which one of my group mate helps me. In our project backend coding involves working on many java files each activity has its own java file.

Group members work:

1. Muhammad Imtiaz (15026420): He worked on documentation make use cases, CRC cards and in coding part, he also worked on forget password, data retrieval on parent side.
2. Atiq Zaman (15026391): He works on documentation functional part as well as some part of coding like Notification for vaccinator and parent. He also works on calendar implementation and recycler view.
3. Muhammad Haroon (14031184):He works on front end of our project.
4. Zainab Malik (15026433):she works on database , then she works on backend coding in which she has done data retrieving part and showing them in screen.
